Summary

Motivated Computer Science and Business Systems undergraduate with a strong interest in **Artificial Intelligence, Machine Learning, technology, software development, and problem-solving**. Strengths include **analytical thinking, logical reasoning, adaptability, teamwork, and a willingness to learn and apply emerging technologies**. Experienced in working on technical projects involving **AI/ML concepts, data analysis, and software development**, while collaborating with teams to understand requirements and develop practical solutions. Seeking an opportunity to **build expertise in AI/ML and software technologies, contribute to real-world projects, and grow as a technology professional**.

Education

2023–2027	**B.Tech – Computer Science & Business Systems**, SRM Institute of Science and Technology, Ramapuram, Chennai	**CGPA: 8.94/10**
2021–2023	**Higher Secondary Education**, Velammal Vidhyashram	**69.6%**
2019–2021	**Secondary Education**, Velammal Vidhyashram	**82%**

Technical Skills

Programming	Python, Java, JavaScript, SQL
AI / ML	Machine Learning, Deep Learning, Generative AI, Predictive Modeling, Prompt Engineering
Data / Web	Data Analysis, Data Visualization, HTML, CSS, React, Flask, Plotly
Tools	Git, GitHub, Microsoft Excel, Microsoft Word, Microsoft PowerPoint, Canva
Professional	Software Development Life Cycle (SDLC), Problem Solving, Analytical Thinking, Communication, Team Collaboration, Adaptability, Debugging

Projects

EnerCast – AI-Powered Energy Forecasting System

- Developed an end-to-end energy forecasting platform using **Python** and **ARIMA, Random Forest, and LSTM** models to predict energy consumption.
- Integrated **real-time weather data** with historical energy data to incorporate external factors into forecasting and analysis.
- Built a **React + Flask dashboard** to visualize energy trends, forecasts, and key performance indicators through interactive visualizations.

Tech Stack: Python, Flask, React, TensorFlow, ARIMA, Random Forest, LSTM

Stock Price Predictor Web Application

- Developed a **machine learning web application** for stock price forecasting and historical trend analysis.
- Integrated a **Flask backend** with TensorFlow models to process data and generate predictive results.
- Implemented interactive **Plotly visualizations** to communicate historical trends and model predictions.

Tech Stack: Python, Flask, TensorFlow, Plotly

Leadership & Achievements

Vice President – TechPro Club	Led planning and execution of **3 major technical events**, coordinating student teams, volunteers, and technical workshops.
Student Coordinator – Texus Culturals	Coordinated volunteers, event logistics, and team activities for university cultural events.
Smart India Hackathon	Advanced to the **Third Round** as part of a multidisciplinary team, contributing to solution development, technical discussions, and problem solving.

Certifications & Courses

YUVA AI for ALL – MeitY, Govt. of India	AI Fundamentals & Responsible AI — 2026
Introduction to Generative AI – Google Skills	Generative AI, Deep Learning, Transformers, Prompting & Google Cloud — 2026
GitHub Foundations – GitHub	Git, GitHub & Version Control — 2026
